

1.2.1 Percentage of new courses introduced out of the total number of courses across all programs offered during the last five year

MLR Institute of Technology changes the syllabus frequently in all programs by including new courses in curriculum. This is inextricably intertwined with the feedback on curriculum process. As per the SoP, Feedback on Curriculum is collected from the stakeholders and a designated committee will analyze and come up with action points for implementation. Based on the Action to be taken, new courses, revision in programs, and introduction of value addition courses, transferable skills etc are introduced. There are a total of 2931 Courses across the 17 Programs offered by MLRIT in the last five years. Out of these, 601 are the new courses introduced in the last five years across all the programs.
